

SUMMARY:

Performance-driven Systems Engineer with over 4 years of specialized experience in PostgreSQL Database Administration at Tata Consultancy Services (TCS). Proven expertise in managing large-scale production, testing, and development environments to ensure optimal performance and reliability. Proficient in implementing high-availability configurations, robust backup and recovery strategies using PgBackRest, and performance tuning techniques to achieve 100% database uptime. Committed to leveraging technical skills to drive operational excellence and support business objectives.

PROFESSIONAL SKILLS:

Databases :

PostgreSQL (13-17+), RDBMS Architecture, MVCC .

High Availability :

Streaming Replication, Failover, Switchover, Disaster Recovery (DR)

Operating Systems :

CentOS 8/9, Windows 10, UNIX/Linux

Upgrades & Migration :

pg_upgrade, Version Migration

Backup & Recovery :

PgBackRest, pg_dump, pg_restore, pg_basebackup, PITR

Performance Tuning :

Query Optimization, Indexing, Vacuum, Reindex, Analyze

Tools :

pgAdmin, Putty, MobaXterm, WinSCP

Security :

Role-based Access Control, Auditing, Grants/Revoke

WORK EXPERIENCE:

Tata Consultancy Services Ltd – Database Administrator

Hyderabad | 05/2023 – Current

- Monitoring and maintaining DBs for their Optimal Performance and ensuring 100% availability of the DBs.
 - Installed, configured and maintained PostgreSQL 12-17 versions.
 - Proficient with backup and Recovery using traditional utilities like pg_dump, pg_dumpall, pg_basebackup, pg_restore and psql.
 - Creating database objects, and maintaining user privileges and roles.
 - Deploying different extensions on the database server.
 - Worked on changes implementation on postgresql.conf file and pg_hba.conf file as per the requirement.
 - Performed Maintenance Activities like Vacuum, Vacuumfull, Analyze and Reindex.
 - Monitoring database performance using pgAdmin and custom script.
 - Managing and configuring PostgreSQL database, Configuring and managing Streaming Replication. Knowledge in Disaster Recovery (DR) activities and primary-standby switchover/failover using streaming replication, ensuring high availability and minimal downtime.
 - Knowledge in PostgreSQL database upgrades using pg_upgrade, ensuring smooth version migration with minimal downtime and data integrity.
-

Tata Consultancy Services Ltd – Junior Database Administrator

Hyderabad | 03/2022 – 04/2023

- Monitored and managed production database 24/7, providing on-call support to ensure system reliability.
 - Experience in monitoring and maintaining development, testing and production environments. Worked on Replication and Log shipping monitoring.
 - Executed backups using pg_dump and restored data with pg_restore to maintain data integrity. Performed backups using pg_basebackup and conducted restoration.
 - Installing Postgres database in CentOS server.
 - Taking backups using pg_dump and performing the restoration using pg_restore.
 - Monitored replication and log shipping processes to ensure data availability and consistency.
 - Creation of roles and giving Grant/Revoke permissions based on the requirement.
-

EDUCATION:

Bachelor of Technology– (2017 –2021)

Krishna Chaitanya Institute Of Technology & Sciences(JNTUK)
